APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.6 cubic feet per second.

Actual construction work shall begin on or before June 15, 1923.

Proof of commencement of work shall be filed before July 15, 1923.

Work must be prosecuted with reasonable diligence and be completed on or before June 15, 1925.

Proof of completion of work shall be filed before July 15, 1925.

Application of water to beneficial use shall be made on or before September 15, 1928.

Proof of the application of water to beneficial use must be filed with State Engineer on or before October 15, 1928.

Proof of labor filed July 13, 1923

WITNESS MY HAND AND SEAL this 15 day of February, 1923

[Signature] State Engineer.

Handwritten notes: 12/16/26

This Permit is issued subject to all prior rights on the source and is for 1.6 second-feet of water for 200 acres of land within the tract proposed to be irrigated as described herein, notwithstanding the fact that the NW $\frac{1}{4}$ SE $\frac{1}{2}$ of Section 24, T.30 N., R.39 E. is included in the description of land for which a water-right has been granted under Permit No. 4040 from Siard Springs. It is understood, however, that, at the time of filing proof of beneficial use under this permit, the land upon which water has been used from the source named herein will be segregated from the land irrigated under said Permit No. 4040. A substantial headgate and weir must be installed at or near the point of diversion to facilitate the measurement and control of water. The State reserves the right to regulate the use of water under this Permit at any and all times. It is understood that the applicant agrees to the terms herein contained.
